EDUCATION

ICFAI University, Tripura — B.Tech, Computer Science and Engineering (4th Year)
CGPA: 9.63 (6 Semesters)

2023 – Present

EXPERIENCE

Backend Developer [\[GitHub\]](#) [\[Certificate\]](#) | National Informatics Centre (NIC) — Tripura, India

Jul 2025 – Sep 2025

- Developed a Spring Boot-based backend architecture for a highly sensitive child marriage prevention platform, coordinating multi-department government response teams (SDM, DM, Police) to manage 100+ active cases.
- Designed and implemented 15+ secure RESTful APIs to facilitate team formation workflows, optimizing database queries to reduce response latency by 30%.
- Architected a supervised report-merging algorithm for consolidated case reporting, streamlining administrative workflows and cutting processing time by 40%.

Full Stack Intern [\[GitHub\]](#) [\[Certificate\]](#) | Yupcha Softwares — Remote

Jun 2025 – Jul 2025

- Built a dynamic Tweet Generator platform, leveraging Solid.js over React to improve frontend reactivity and significantly reduce initial page load times by 45%.
- Integrated Supabase for real-time database management and secure user authentication, supporting 500+ concurrent user sessions with sub-200ms latency.
- Architected the deployment pipeline and managed the application infrastructure utilizing Cloudflare, ensuring 99.9% uptime and high scalability.

PROJECTS

Zirith CRM — Automated Lead Management Platform [\[GitHub\]](#)

Jan 2026 – Present

Next.js, React, TypeScript, TailwindCSS, MongoDB, Vercel Cron Jobs

- Engineered a centralized lead management platform integrating Google Authentication and Clay webhooks, automating the ingestion and storage of 10,000+ targeted B2B leads monthly.
- Developed a Hubspot-inspired real-time Kanban pipeline with an automated round-robin system, equitably distributing 300+ incoming leads per week among team members.
- Designed a background automation engine utilizing Vercel Cron Jobs to enforce SLAs, triggering 50+ daily follow-up tasks and eliminating manual lead tracking workflows entirely.

PsychAssist — Local AI Psychological Frameworks [\[GitHub\]](#)

2025

Next.js, Tailwind CSS, Llama 3, Ollama

- Built a 100% private, locally hosted AI psychology assistant running Llama 3 via Ollama, ensuring zero data egress while generating therapeutic responses in under 800ms.
- Engineered a dynamic "Sentiment UI" that adjusts background visuals based on user input, and integrated neural text-to-speech, enhancing interaction fluidity for 10+ distinct session types.
- Programmed specific philosophical personas (CBT, ACT, Stoicism) and a safety gate that intercepts 100% of crisis keywords to automatically route users to emergency resources.

AI Interview Coach — AI-Powered Mock Interview Platform [\[GitHub\]](#)

2024

TypeScript, React, Tailwind, OpenRouter AI, ElevenLabs API

- Developed an interactive mock interview platform utilizing OpenRouter AI to generate dynamic, role-based technical questions, saving users an average of 5+ hours of manual prep time per week.
- Integrated live webcam and microphone access with the ElevenLabs API for realistic text-to-speech AI interviewer voices, achieving sub-second audio response latency.
- Designed an AI evaluation engine that parses user transcripts to deliver actionable, quantified feedback on tone, clarity, and technical confidence within 5 seconds of session completion.

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Python, Java, SQL

Frontend: React.js, Next.js, Solid.js, HTML5, CSS3, Tailwind CSS, shadcn-ui

Backend & DB: Node.js, Express.js, Spring Boot, FastAPI, MongoDB, PostgreSQL, MySQL, DynamoDB, Supabase

DevOps & Tools: Docker, Nginx, Git, GitHub, Vercel, AWS, Cloudflare, Ollama

ACHIEVEMENTS

- LeetCode:** Solved 200+ problems (Rating: 1414, Top 79%); secured a 132-day max streak and earned the '100 Days' badge.
- CodeChef:** Achieved a 3-Star rating (1616 peak) by consistently solving complex algorithmic challenges and optimizing C++ solutions for time and space complexity.
